

Siggga

MOBILE EAM

Put SAP PM in the palm of your hand.

Orders

Execute planned orders, create new orders for immediate service, reserve materials and record working time.

Equipment

Change the installation location or register new equipment with basic information and operating characteristics such as capacity, power, load, flow and more.

Notifications

Import SAP maintenance notes, create stand-alone or order-related notes, operations, and measurement documents.

Forms

Eliminate paper by recording maintenance processes using mobile forms.

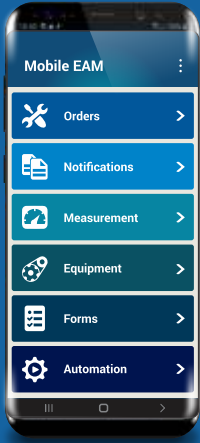

Measurement

View, create and share measurement documents and equipment data – online or offline.

Automation

Define templates for common tasks and automate notification and order creation, measurement entries, and equipment movements with the touch of a button.

The ideal, SAP-integrated tool for operations & plant maintenance.

Optimize the execution of your maintenance routines: eliminate unproductive tasks, excessive offsets and paper usage.

SAP® Certified
Powered by SAP NetWeaver®

SAP® Certified
Integration with SAP S/4HANA®

Main Benefits

Increase Productivity

Eliminate inefficiencies throughout maintenance processes and instantly create and send notifications for critical issues.

Optimize Operational Processes

Standardize processes to gain consistency in field activities and more accurate reporting.

Enhance Data Accuracy

Eliminate manual processes and ensure SAP is updated with accurate data, collected through a single mobile application.

Improve Resource Allocation

Track activities of users in real-time and analyze deviations and stops in the execution of services, making it possible to review plans and reallocate resources.

Technology Integration for Industry 4.0

Incorporate assistive technologies into your maintenance processes and increase data accuracy by connecting machines, systems and people.

Effective Confirmation of Execution

Allow techs in the field to access the data necessary to confirm services at the time of execution.

Applied Technologies

Mobile EAM integrates with leading tools and technologies to streamline your maintenance processes.
