

# The Global Leader in Asset Management Solutions, Focused on Maintenance

SAP® Certified  
Integration with RISE with SAP S/4HANA® Cloud

## The Sigga Experience

For 25 years, we have earned the trust of and improved the management of enterprise assets in more than 15 asset-intensive industrial segments for companies using SAP.

Sigga was founded by EAM consultants with deep knowledge of the industry's challenges and opportunities to optimize working with SAP®. Over the years, our software and services development has focused on delivering high-performance mobile experiences. We also accelerate ease of implementation and scalability for enterprise IT environments.

Discover some numbers that prove the effectiveness of our solutions.

## Mobilize your field team.

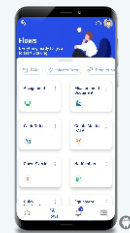

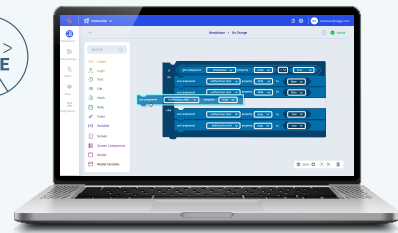

Easily adapt workflows to your business needs without customizations with our no-code platform.

Replace paper and put mobile devices in the hands of your technicians to see a significant improvement in your KPIs.

The no-code platform features an intuitive drag-and-drop interface, based on common business logic, not software code. It offers more flexibility, time savings, and cost-effectiveness for you and your IT team to easily implement mobile experiences.

SAP® Certified  
Integration with RISE with SAP S/4HANA® Cloud

## Main features

### Complete maintenance workflows

Control work orders from start to finish while in the field, with instant access to SAP.

### No-code application platform

Flexibility to adapt the application at any time, with easy-to-use drag-and-drop visual modeling tools. Includes logic blocks, flowcharts, and screen designers.

### Online/Offline Functionality

Complete offline experience with automatic background synchronization online to prevent any interruptions.

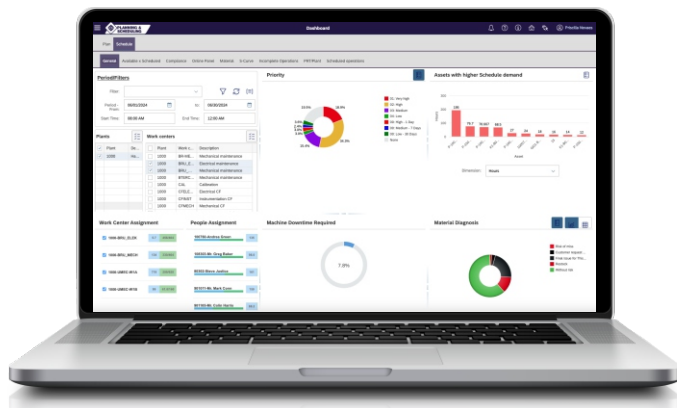

### Exclusive SAP integration mechanism

It handles your complex, high-volume data scenarios while maintaining performance, reliability, and security at enterprise scale.

SAP® Certified  
Integration with RISE with SAP S/4HANA® Cloud

## Manage your maintenance resources more efficiently.

Sigga Planning & Scheduling™ software offers an intuitive interface to optimize your time and improve the performance of your maintenance team. You can adopt automation to create annual maintenance budgets and track their status according to your plan. The software helps organize work orders, automatically checking capacities and availability, and identifying resources to create the schedule.

Card and Gantt chart views allow you to make final adjustments and, at the touch of a button, you can update work orders in SAP® for dispatch. If you want to further expand automation, the solution allows the inclusion of customized rules according to your planning.

## More than just support: how Customer Success improves your results.

At Sigga, we go beyond support: we deliver value to your business and maximize the benefits of our products and services. With a proactive approach, we anticipate your needs and strengthen relationships.

### Focus on customer value:

We ensure that customers understand the value they receive from a product or service and how to leverage it effectively.

### Proactive engagement:

We anticipate customer needs and address potential problems before they escalate.

### Relationship building:

We build strong, long-term relationships with clients, fostering trust and loyalty.

### Integration and training:

We provide effective integration and ongoing training to help customers adopt the product or service quickly and confidently.

## Sigga customer testimonials

*Sigga eliminates maintenance bureaucracy, increasing technician productivity and ensuring data quality.*

**Maintenance Engineering**

*Sigga evolves every day, and it's clear how important its solutions are to improving our maintenance indicators.*

**Maintenance Engineering**

*Sigga is the most complete maintenance tool on the market. I have a lot of faith in the application and the Sigga team, and this is reflected in internal acceptance within the company.*

**Maintenance Engineer, Beverage Company**

*In addition to having the best business proposal, Sigga's ability to handle large amounts of data both online and offline was fundamental in helping us make our decision.*

**IT Manager - Sugar and Bioenergy Company**
